

Bachelor of Science Health Economics

Standard period of study: 6 semesters, full-time

Start: Fall term

Degree title: Bachelor of Science

PROGRAMME STRUCTURE

The Bachelor's programme carries 180 ECTS credits and comprises a Core and Advanced Section, a Specialisation Section, a Supplementary Section and a Bachelor's thesis.

Bachelor of Science Health Economics

Health economics is an interdisciplinary science that is situated between economic sciences and medicine.

Starting point is the assumption, that the factors of production (like workforce, assets and materials), which are necessary to provide services in the health sector are not available in unlimited quantities. It is the goal of health economists, to use these resources effectively and efficiently and to apply them to their purpose in an optimal way. Obtaining a basic medical knowledge helps to understand health economic and medical aspects.

The bachelor programme in health economics prepares students to comprehend the complexity of health-care specific problems and to solve them in the best way possible.

Perspektives

Being able to set an individual emphasis opens various career prospects in Germany and abroad. The faculty supports students in their ambitions e.g. via the WiSo-Career-Service.

Over the course of the programme, students develop competencies regarding the arrangement of economic and organisational processes in the health sector. Graduates usually find employment in the consulting sector of private and public corporations like clinics, large medical practices, health insurers, institutions, organisations and corporations of the health industry and the sport-, preventive-, and rehabilitation sector.

A good bachelor degree opens the possibility to apply for the consecutive Master of Science programme in Health Economics at the WiSo-Faculty.

Internationality

The International Relations Center (ZIB) can help you take part in certain exchange programmes. This programme also offers modules taught in English.

Application

Tanja Rombey

1st Semester B.Sc. Health Economics

„I decided to study the Bachelor of Science in Health Economics, because it allows me to connect my interest in medicine and economic science perfectly! Additionally, there are various possibilities to continue after graduating; I can imagine continuing in the master programme or directly engaging in professional life.“
