

Bachelor of Science Economics

Standard period of study: 6 semesters, full-time

Start: Fall and summer term

Degree title: Bachelor of Science

PROGRAMME STRUCTURE

The Bachelor's programme carries 180 ECTS credits and comprises a Core and Advanced Section, a Specialisation Section, a Supplementary Section and a Bachelor's thesis.

Bachelor of Science Economics

The study of Economics comes under the economic sciences and deals with conditions and processes in entire political economies, such as national states.

The point of departure for all contemplation is the assumption that the factors of production with which economies generate their goods and services (e.g. workforce, capital or material) are not available on an unlimited scale. In using these resources, economies must therefore seek to operate at optimum conditions to achieve their objectives.

The bachelor's program in Economics prepares you to solve these problems most effectively.

Perspectives

The Bachelor programme in Economics conveys core competencies that can be applied to a variety of activities in economic life. In particular, students acquire knowledge of economic and formal methodologies for the analysis of micro- and macroeconomic issues prevailing in modern national economies. This specific methodological competence distinguishes graduates of Economics from those of other branches of study.

Depending on your personal priorities, you can profit from a wide array of career prospects at home and abroad, in private and public corporations, foundations, trade unions, associations and chambers. Whatever you decide on, we will support your ambitions, for example through the WiSo Career Service.

Variety and freedom of choice

One of the most important features of this degree is its wide range of courses. You can choose from a number of options in Business Administration, Management Studies and Economics, and Social Science, including specialisations and supplementary modules. This allows you to tailor your studies to your personal preferences and (career) goals.

Internationality

The WiSo-Faculty provides you with many opportunities to spend a part of your studies abroad. You can benefit from the Faculty's well-established partnerships with more than 80 distinguished academic institutions worldwide and its comprehensive portfolio of international study programs.

Hannah Siewert

B.Sc. Economics

„I study economics at the University of Cologne because the size of the faculty offers me a vast selection of modules and specialisations. Here I have the possibility to study abroad for a semester almost anywhere in the world, moreover learn from renowned scientists. And obviously, Cologne is also a great place to study!“
